Building Legacies with Infinite Vision

Construction | Infrastructure | Government Contracting

An EPC organisation committed to structures that perform, endure,  
and define the landscape for decades.

# ABOUT US

At Virat Visionsz Pvt Ltd, we don't just construct buildings. We engineer legacies. Based in Noida (Delhi NCR), our mission is simple - deliver infrastructure that stands the test of time, built on unshakable values:

- DISCIPLINE.
- HONESTY.
- MEASURABLE QUALITY.

- ➔ We don't build for today.
- ➔ We build for decades.
- ➔ For performance, not just possession.
- ➔ For integrity, not shortcuts.

## What we stand for :

### Technical Accuracy

Every beam, every slab, every load-bearing element is engineered with exacting precision. We go beyond minimum code requirements - designing and building for strength, safety, and long-term stability. Because we believe every structure should be more than just functional; it should be future-proof.

### Transparent Engineering

No hidden numbers. No assumptions. Only clear BOQs, verified materials, and documented workflows. We show you the real engineering behind your project - full clarity & trust.

### On-Schedule Delivery

From Engineering → Procurement → Construction - our EPC workflow eliminates chaos. Each phase flows seamlessly, calculated. We deliver not just as promised, but on time, every time.

# OUR SERVICES

## Government Contracting & Public Works

Execution of civic, institutional, and infrastructure projects with engineered planning, compliance-driven documentation, and disciplined site governance. Every project follows strict IS codes, technical workflows, and transparent reporting.

## Turnkey Residential Construction

From soil testing to structural design, RCC, MEP, finishing, and final handover - we deliver complete residential projects with an EPC mindset. Every stage is monitored through technical checkpoints, ensuring precision, safety, and long-term stability.

## Commercial & Industrial Infrastructure

Offices, warehouses, retail developments, hospitality units, and industrial structures engineered for heavy-load cycles, operational efficiency, and lifespan performance. Built for reliability, built for scale.

## Quality & Material Standards

We procure only from tested, industry-trusted brands:

**TATA • JSW • ULTRATECH • ACC**  
**• KOHLER • ASIAN PAINTS • BERGER**  
**• HAVELLS • POLYCAB**

...and several more certified suppliers.

All execution strictly follows Indian Standard Codes:

- IS 456 – RCC Work
- IS 875 – Structural Loads
- IS 1786 – Reinforcement Steel
- IS 383 – Aggregates
- IS 9103 – Admixtures
- IS 13920 – Ductile Detailing

Each step is backed by testing, supervision, documentation, and traceability - ensuring structures that perform today and endure for decades

# EXECUTION FRAMEWORK

At Virat Visionsz, execution is not project management.  
It is controlled engineering.

Every stage follows a structured, documented EPC workflow designed to eliminate errors, delays, and guesswork.

## Execution Framework

### → SITE STUDY & ENGINEERING FEASIBILITY

Detailed soil tests, topography analysis, drainage logic, load calculations, and complete service-layout planning.

We build understanding before we build structures.

### → STRUCTURAL DEFINITION & BOQ DEVELOPMENT

Reinforcement detailing, sequencing charts, design coordination and a clear, executable BOQ — engineered for accuracy, clarity, and constructability.

### → CONTROLLED PROCUREMENT & SKILLED DEPLOYMENT

Verified vendors, approved materials, logistics planning, and disciplined manpower allocation.

Right material. Right team. Right time.

### → ON-SITE ENGINEERING & QUALITY AUDITS

Daily RCC supervision, bar checking, curing control, MEP coordination, and strict safety protocols.

Every activity is tested, monitored, and documented.

### → HANDOVER, CERTIFICATIONS & SUPPORT

Final inspections, compliance certificates, material logs, test reports, and complete post-project support.

Because delivery doesn't end at completion - it ends with reliability.

This is not basic project management.

**THIS IS CONTROLLED EPC EXECUTION.**
